

## WEEK 5

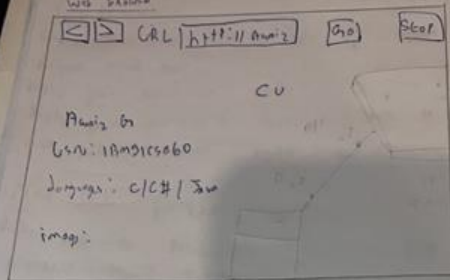

Configure Web Server, DNS within a LAN.

OBSERVATION:

Output:

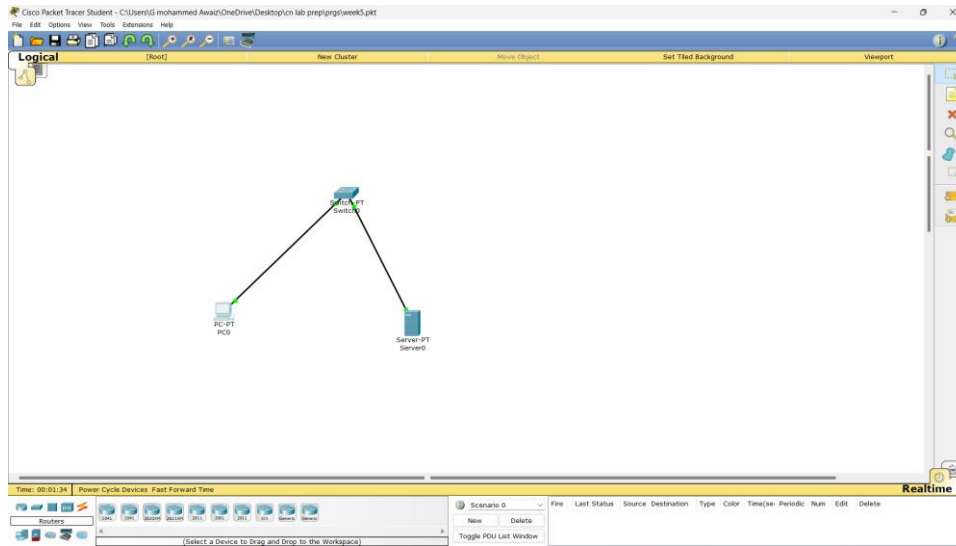

Web browser

Observation:

- 1) We can access a website by typing its domain name and searching through web browser or we can also use the IP address.
- 2) Since we can't find IP address we search through it to find a matching IP address for the domain name.
- 3) The domain name is related to the IP address of
